THE EMPI ADVANTAGE

Introducing **EMPI's** line of over **1325** New Constant Velocity Drive Axles. This catalog lists over **2583** specific passenger car, light truck, van, and SUV applications for both foreign and domestic vehicles. **EMPI's** New Drive Axles come packaged in our New **EMPI** Full Color, Tri-lingual (English, Spanish, French) Box. All New Drive Axles are sold per each, (1) per part number.

All New Front Drive Axles start with an "80" prefix and are listed in "Bold" type.
All New Rear Drive Axles start with a "90" prefix and are listed in "Italic" type.

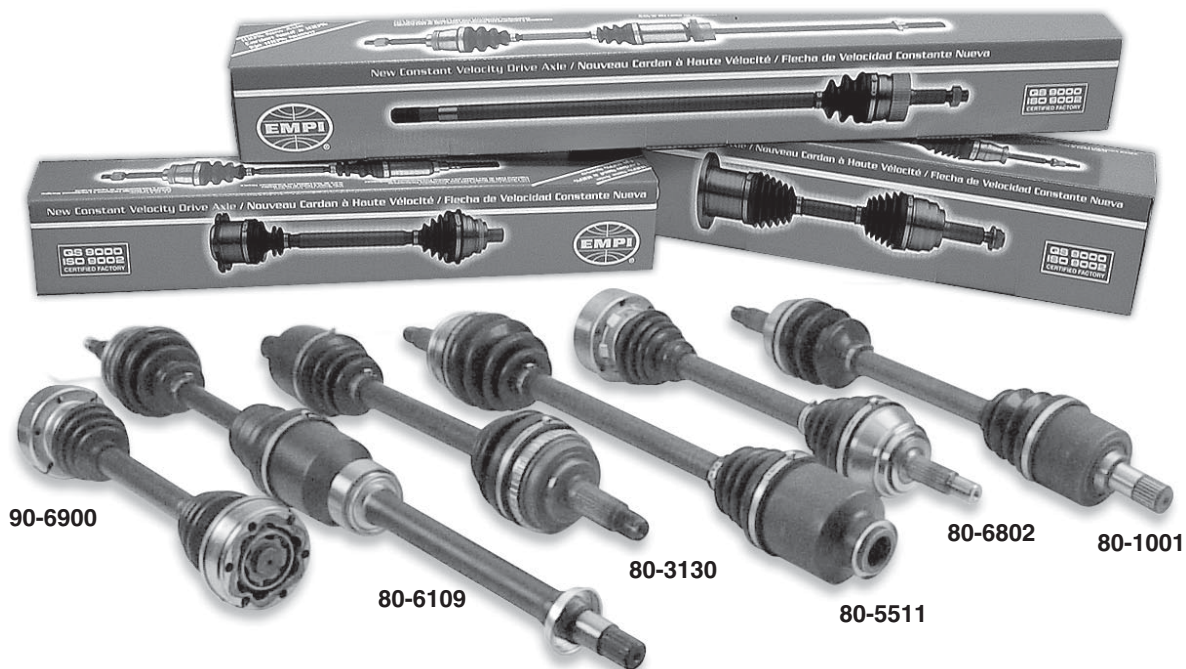

100% New Drive Axles include:

- New C.V. Joints - Inner and Outer
- New C.V. Boots
- New Stainless Steel Boot Clamps
- New Retaining Clip and Hardware (where applicable)
- New Precision Machined & Heat Treated Center Shafts
- New Dust Shields installed (where applicable)
- New Axle Nut (where applicable)
- New ABS Sensor Rings installed (where applicable)
- New Inboard Bearing and/or Flange installed (where applicable)
- Precision ground Bearing Lands and Sealing Surfaces
- New High Temperature / High Pressure Moly Grease
- EMPI Heavy Duty Packaging features New Full Color Graphics, Trilingual language, and Detailed Axle Cut-Away Illustration.

EMPI the Right Axle, the First Time, Every Time!

All **EMPI** Axles are engineered for proper fit and function, but it is important to note the following!!

- EMPI** C.V. Joints may be of a different design than Original Equipment.
- EMPI** Axles, in some cases may require that the ABS Ring be removed.
- EMPI** May replace a Trilobal or Thermoplastic Boot with a Round C.V. Boot.
- EMPI** Center Bars are all of the solid design & do not have or require Dampers.
- EMPI** Axles/Joints may have different size threads and nuts than the O.E.
